

County Expenditure Limitation Primer

What are expenditure limits?

Limits on how much *local revenue* counties, cities and towns can spend in a given fiscal year according to [Article 9, § 20](#) of the Arizona Constitution.

Local revenues include almost all of the monies received by a county, with exemptions including revenue from or for:

- Debt
- Investment income
- State payments to counties included in the state spending limit
- Aid, grants, etc. from the federal government
- HURF funding in excess of FY80 HURF funds
- Spending on voter-approved capital improvements

Due to these exclusions, the expenditure limit only applied to an average of 56% of FY18 total county spending.

How are expenditure limits calculated?

Expenditure limits are calculated using the actual FY 1980 local revenues spent in each county as a base limit, which is adjusted annually for inflation and population changes.

How can expenditure limits be modified?

Counties can **permanently change their base limit** with approval from the majority of voters at a general election.

Counties can also request a **one-time expenditure limit override** from voters at a special election.

The legislature can adopt a concurrent resolution with a 2/3rds majority to adjust population.

In the event of a disaster declared by the governor, the board can exceed their limit with a 2/3rds vote to cover any disaster-related spending.

Navajo County and Greenlee County have successfully increased their base limit, and La Paz County voters will decide whether or not to increase their base limit in November 2018.

What happens if the expenditure limit is exceeded?

If the Auditor General (OAG) determines that a county has exceeded their expenditure limit without following any of the paths to modify the limit as outlined above, the following occurs:

1. The OAG will hold a hearing to determine if the county did exceed their expenditure limitation.
2. The county's primary property tax levy limit for the next fiscal year is reduced by the amount that exceeded the expenditure limit.^{1,2}
3. Future calculations of the primary levy limit are not affected by the one-time penalty.

History of Expenditure Limits

In 1980, the state legislature held a special session to draft tax reform legislation to be sent to the voters in June of 1980 in an attempt to preempt a November proposition fashioned after Prop. 13 in California.

VOTE YES ON ALL TEN PROPOSITIONS TOMORROW, AND...

Repeal the state sales tax on food effective July 2, 1980.

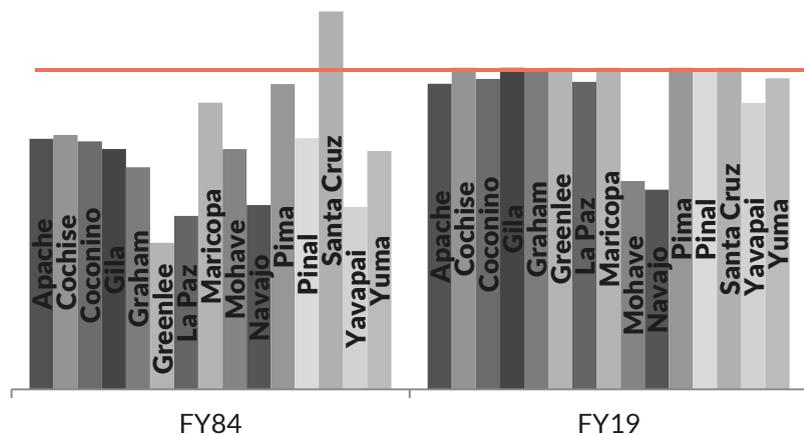

Put the control over property tax and government spending in your hands.

“Lack of effective limitation on local spending has resulted in dramatic increases in budgets which are responsible for the ever increasing local tax burden...”

1980 Legislative Council Arguments Favoring Prop. 108

On June 3, voters approved **all ten propositions**, among which was a constitutional amendment to create local expenditure limitations (80% in support). The November proposition failed to receive a majority of voter support.

Percent of Expenditure Limit Utilized

County **cost drivers have strained** county budgets, causing **8 counties** to be budgeted at their expenditure limit in FY19.
