## Joint Legislative Budget Committee Meets

On Tuesday, June 19, the [Joint Legislative Budget Committee](#) (Committee) met to take action on expenditure requests and transfers. The Committee approved the Arizona Department of Public Safety FY2019 expenditure plan for the Gang and Immigration Intelligence Team Enforcement Mission (GIITEM) Border Security and Law Enforcement Subaccount. Of the \$2.4 million in total expenditures, \$1 million will be used for border security and law enforcement grants; \$500,000 for the detention liaison officer program; \$495,800 for border county officers and \$350,000 for the border crimes unit.

The Arizona Secretary of State (SOS) requested approval for a 5-year expenditure plan for Help America Vote Act projects. The Committee approved \$2.3 million to complete the voter registration database and \$479,100 for an election security assessment in FY2019 and required the SOS to return to the Committee for review prior to expending any funds in FY2020. The Committee did not approve the request by the SOS to increase the cost sharing arrangement for the operating costs associated with the voter registration system from 25 percent to 50 percent. Instead, the Committee approved the current 25 percent so the full Legislature may consider the cost sharing arrangement during the next Regular Session.

## Updated Shared TPT Distribution Chart

As a reference tool, CSA staff has updated the distribution flowchart that outlines how state shared sales tax dollars are distributed to local governments. Included in this document is the proportion of the tax base that each class of goods makes up, as well as how the revenue from those classes is divided between the distribution base and the state's exclusive share of Transaction Privilege Tax (TPT) revenues. Additionally, it also includes how the county portion of the distribution base is split across counties.

In 1937, counties originally received a portion of the then temporary sales tax in order to provide relief to counties that were struggling financially due to high rates of property tax delinquency during the Great Depression. The current formula to distribute state shared sales tax was put in place in 1994 at least in part to provide counties with additional revenues so they could reduce property tax rates. In this revision, counties received an additional 2.43% of the distribution base in order to hold counties harmless when the county distribution changed from being based on point-of-sale and assessed value to point-of-sale and population. This formula allows counties to receive the higher of the two distribution amounts.
